

# RAIJU INU

## ECOSYSTEM

## LIGHTNING (WHITE PAPER)

# INTRODUCTION

We wondered what would happen if a crypto currency project was 100% run by its community and the future of the project revolves around **Web3, Meta** & of course **#RaijuArmy**?

Projects built on the foundation of community involvement are the untamed wilderness of our future.

When success depends on the shared strength of the individuals who make up a collective, we are forced to shift our perspectives to align with those around us.

A community is held together by hundreds, if not thousands, of interconnected moments. By studying those drawn to our project, we realized that true strength doesn't come from one of us alone, it comes from when we work together in harmony. With that thought bright in our minds, we began developing the Raiju Inu Ecosystem in earnest.

# ABOUT US

***"The Myth:** Raiju is the companion of the Shinto god of lightning. While the beast (Raiju Inu) is generally calm and harmless, during thunderstorms it becomes agitated, and leaps about in trees, fields, and even buildings."*

We believe through the power of our community we can build something stronger than a centralized team ever could create. We have taken efforts to build RaijuSwap for our community even when we didn't go public to show and prove to our #RaijuArmy that we'll not disappoint them ever.

1. We started from zero, with zero. It's the spirit of our project to create something out of nothing.
2. We were not founded from an existing community. The brilliant minds behind Raiju were a fresh team of developers, designers, moderators, marketers, and shillers.
3. We are proud of where the #RaijuArmy originated and equally excited for our future.

Starting with nothing means everyone has to bring something to the table. The holders and believers in our Raiju Army have been the source of all our success.

**THANK YOU. You are the real #RAIJUARMY, and we Love you!**

# WHY WEB3 & META?

**Web3**, also known as Web 3.0, is an idea for a new iteration of the Internet that incorporates decentralization based on blockchains.

When you hear about web3, you'll notice that cryptocurrency is often part of the conversation. This is because cryptocurrency plays a big role in many of these protocols. It provides a financial incentive (tokens) for anyone who wants to participate in creating, governing, contributing to, or improving one of the projects themselves.

In the physical world, you transact using fiat currency, which acts as a store of value and a medium of exchange for buying or selling anything you want. But in your virtual world, how do you think you will pay for buying your painting, land, and paying for that Taylor Swift concert in a seamless, instantaneous manner? The answer is simple - Crypto!

It is almost impossible to imagine the **metaverse**, the other, just-as-real world, operating without cryptocurrency. In a world where speed, transparency, and security are almost fundamental, crypto becomes a necessity rather than an option. At its heart, cryptocurrency is the perfect medium of exchange for this exponentially emerging hybrid world.

# THE VISION OF RAIJUSWAP

We are dedicated to building the **best Web3 & Metaverse** Ecosystem on the planet. Our token Raiju Inu was the seed from which the Raiju Inu Ecosystem sprouted, and **RaijuSwap** is how we have struck the world.

The goal of RaijuSwap is to provide a safe place to trade your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to grow exponentially. We will constantly scale this Ecosystem so it may bring ever increasing interested parties to RaijuSwap platform.

Making a swap without a budget is a unique challenge but by tracking various genres and product lines, a focused development team rose from the ranks of our community.

We know that with our unified force, and power of Raiju, we will be successful in advancing the Swap and the Ecosystem as a whole, so that we reach new and spectacular heights together.

**The best is yet to come!**

# A HEADSTART WITH RAIJUFIAT

Before going public, we thought about our community member, the people, why can't they directly buy the tokens from our own page? With our growing **Web3** Ecosystem, we now allow our users to buy crypto without leaving our website. Simple UX and multiple fiat gateways makes our **RaijuFiat** more powerful and easy to use.

The goal of RaijuFiat is to provide a safe place to buy your valuable crypto while remaining decentralized. We are loyal to our holders, and that gives us the means to constantly scale this Ecosystem.

Making a fiat-to-crypto system without a budget and within a short range of time is a unique challenge, but for bringing trust and confidence to our community, we went a step ahead and successfully completed RaijuFiat.

**This is just a small step for Raiju.**

# RAIJU ECOSYSTEM TOKENOMICS

## \$RAIJU INU

RAIJU struck this world on January 2022. After we finished minting 599 trillion tokens, we locked away 90% of it on PancakeSwap. Remaining 10% are used as a **thunder fuel** for our **lightning growth**!

## RAIJU TOKENOMICS

# CONCLUSION

The Raiju community started with the seed of an Idea: What could happen with no centralized team, no funding and no direct leadership? Could we follow the perfect storm of Metaverse & Web3 with a fully community-driven token?

This is the beginning of a new era for decentralized communities. We will together bring a new metaverse 'RaijuVerse' which will revolutionize the Web3 space.

Again, we would like to say thank you to each and every one of you. Without your participation, none of this would be possible.

**It's time for us to Strike #RaijuArmy!**

*This is a living document and information is up to date at the time of publishing. Please note, information herein does not constitute investment advice, financial advice, trading advice, or any other sort of advice and you should not treat any of the content as such.*

*The RAIJU INU team suggests you conduct your own due diligence and consult your financial advisor before making any investment decisions. By purchasing any Raiju Inu product, you agree that you are not purchasing a security or investment and you agree to hold the team harmless and not liable for any losses or taxes you may incur. You also agree that the team is presenting the products 'as is' and is not required to provide any support or services. You should have no expectation of any form from the Raiju Inu Ecosystem and its team. Although Raiju Inu is a community driven DeFi Web3 Meta Ecosystem and not a registered digital currency, the team strongly recommends that citizens in areas with government bans on Crypto do not purchase it because the team cannot ensure compliance with your territories regulators. Always make sure that you are in compliance with your local laws and regulations before you make any purchase.*
